

CREATE IBM WATSON IOT PLATFORM AND DEVICE

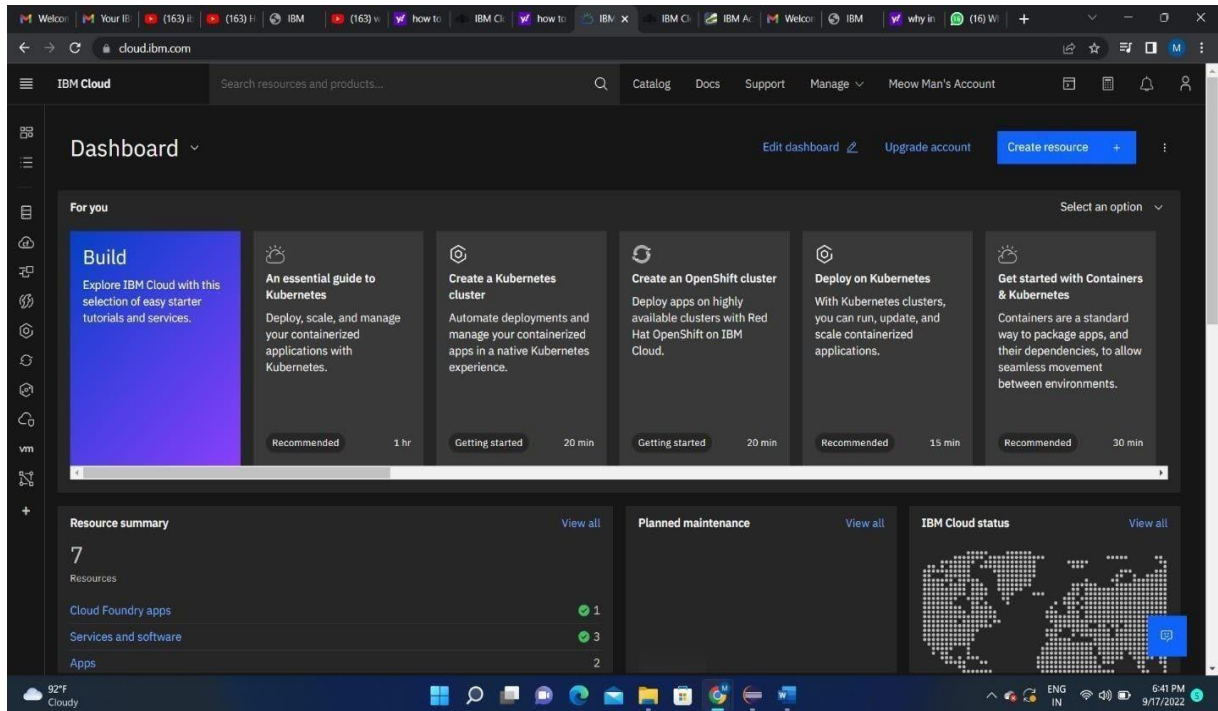

Date	22-10-2022
Team ID	PNT2022TMID17666
Project Name	IOT based safety gadgetfor child safety monitoring and notification
Maximum Marks	4 Marks
Submitted By	Priya.v Vasunthara.D Janani Ishwarya.S Janani.R

STEPS:

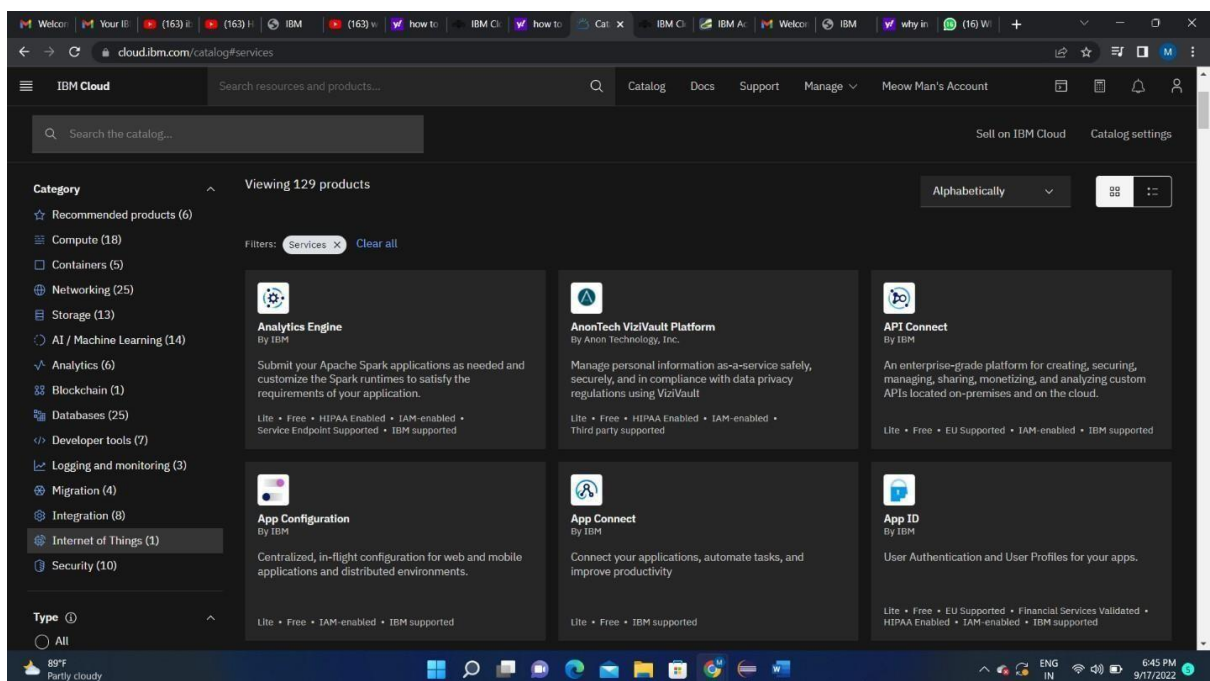

1. Firstly create an IBM cloud account with IBMid and password

2. Home page of IBM cloud

3. Click on the catalog on the top

Click on IoT in the category mentioned

The screenshot shows the IBM Cloud IoT Platform page. The 'Create' tab is active, displaying a 'Select a location' dropdown menu with 'Dallas (us-south)' selected. Below this, a 'Select a pricing plan' section shows a table with the 'Lite' plan selected. The table lists features such as 'Includes up to 500 registered devices, and a maximum of 200 MB of each data metric' and 'Maximum of 500 application bindings'. The pricing is listed as 'Free'. On the right, a 'Summary' panel shows the service name 'Internet of Things Platform-bb' and a resource group 'Default'. A warning message states: 'Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.' Below the warning, there is a checkbox for 'I have read and agree to the following license agreements:' with a link to 'Terms'. At the bottom, there are 'Create' and 'Add to estimate' buttons.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

4. If already a lite is present delete it else u can't create another

The screenshot shows the IBM Cloud IoT Platform page with the 'Configure your resource' section. The 'Service name' field is filled with 'Internet of Things Platform-bb'. The 'Select a resource group' dropdown menu shows 'Default' selected. The 'Tags' field is filled with 'Examples: env:dev, version=1'. The 'Access management tags' field is filled with 'Examples: access:dev, proj:version=1'. On the right, the 'Summary' panel shows the service name 'Internet of Things Platform' and a resource group 'Default'. A warning message states: 'Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.' Below the warning, there is a checkbox for 'I have read and agree to the following license agreements:' with a link to 'Terms'. At the bottom, there are 'Create' and 'Add to estimate' buttons.

5. Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with agreements and then click on create

6. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

The screenshot shows the IBM Cloud IoT Platform console. The left sidebar has a 'Manage' tab selected. The main content area displays a 'Let's get started with IBM Watson IoT Platform' section with a 'Launch' button. Below this is the 'IBM Watson IoT Platform Journey' section, which shows three stages: 'Lite', 'Non-Production', and 'Production'. The 'Lite' stage is currently selected and shows a 'Free' pricing plan. The 'Non-Production' stage shows a 'Starts at \$500 per month' pricing plan. The 'Production' stage shows an 'Includes IBM Service & Support' pricing plan.

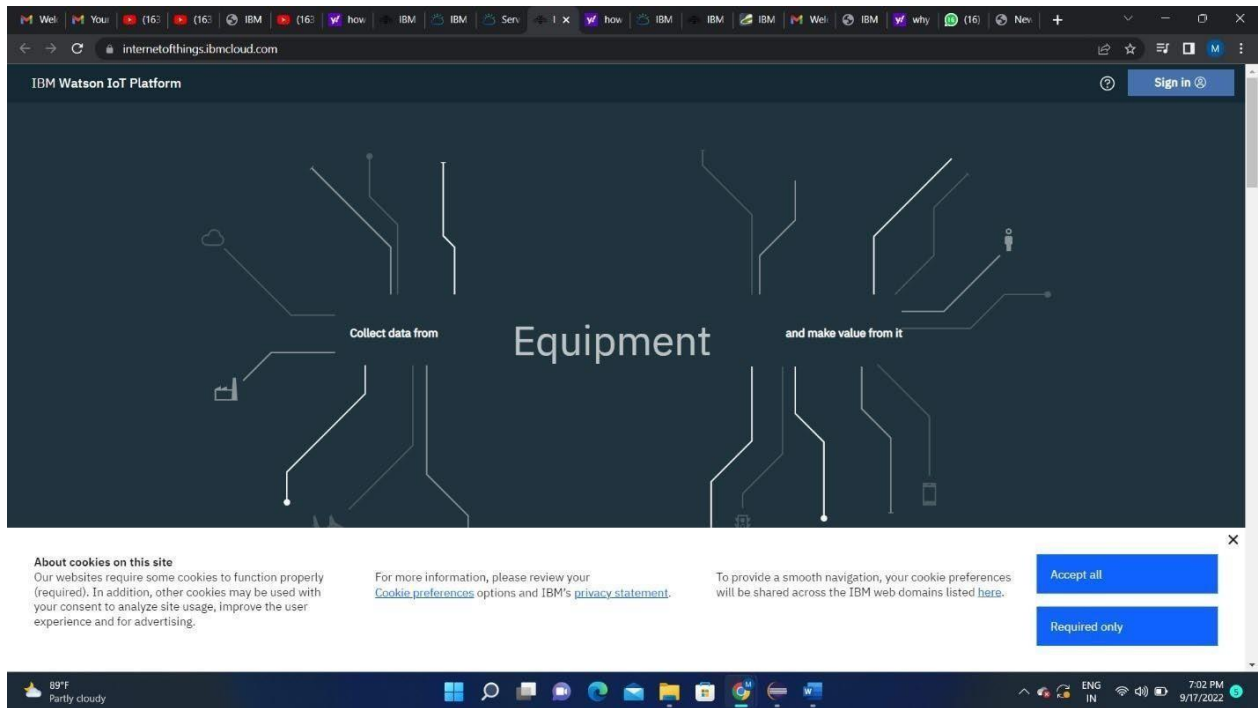

The screenshot shows the IBM Cloud IoT Platform console with the 'Plan' tab selected. The main content area displays the 'Current plan' section, which shows the 'Lite' plan. The 'Features' section lists the following details:

- Includes up to 500 registered devices, and a maximum of 200 MB of each data metric
- Maximum of 500 registered devices
- Maximum of 500 application bindings
- Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed

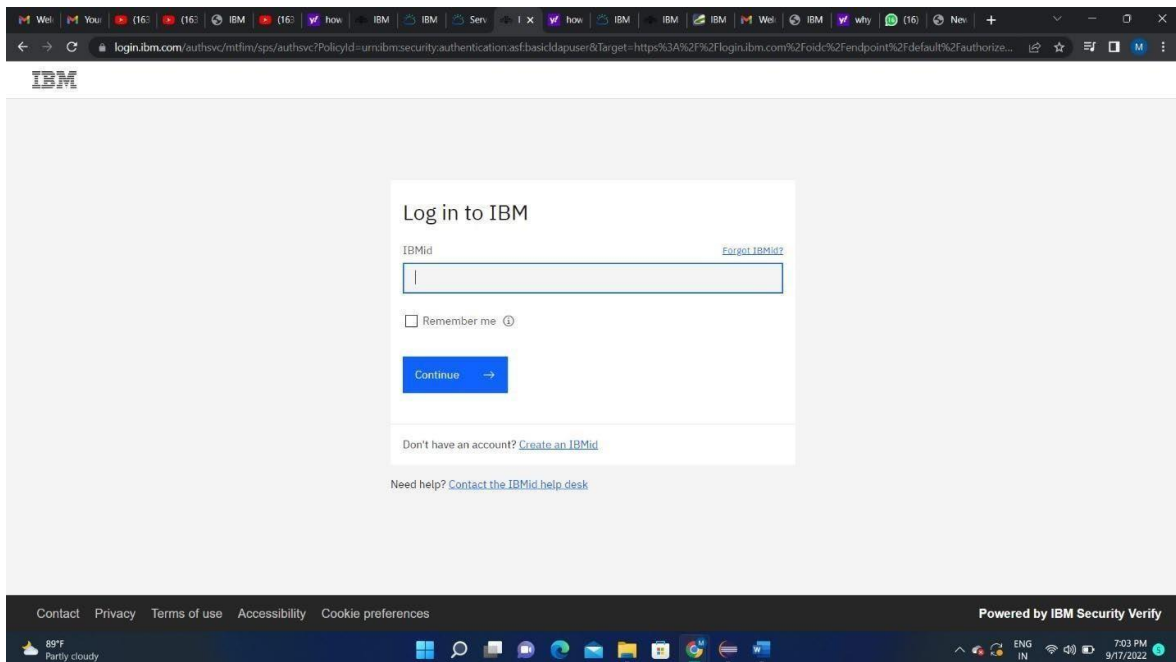

The 'Change pricing plan' section shows a table with the following columns: Plan, Features, and Pricing.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

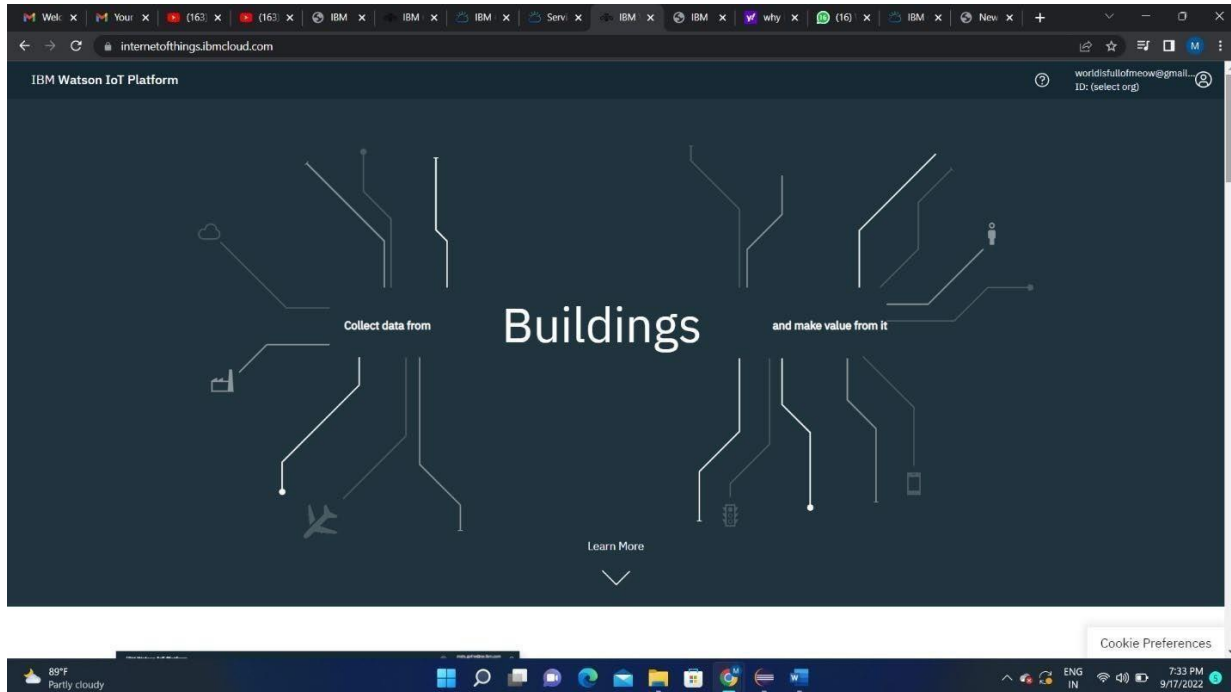

7. Clicking on the launch button in the manage tab, it will open to this

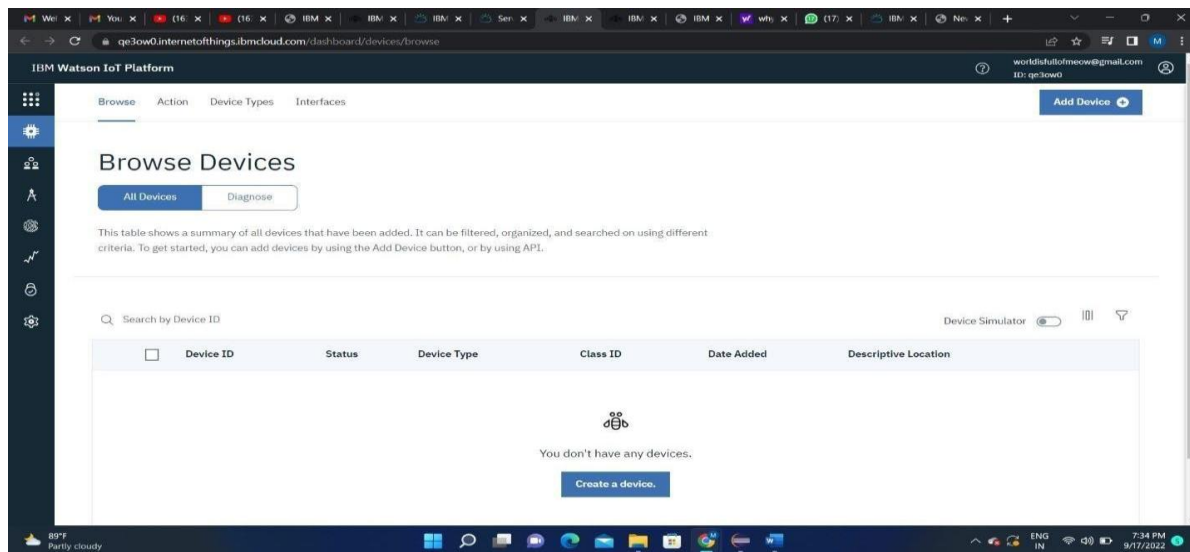

8. Enter the details to sign in to the Watson Cloud to create a device

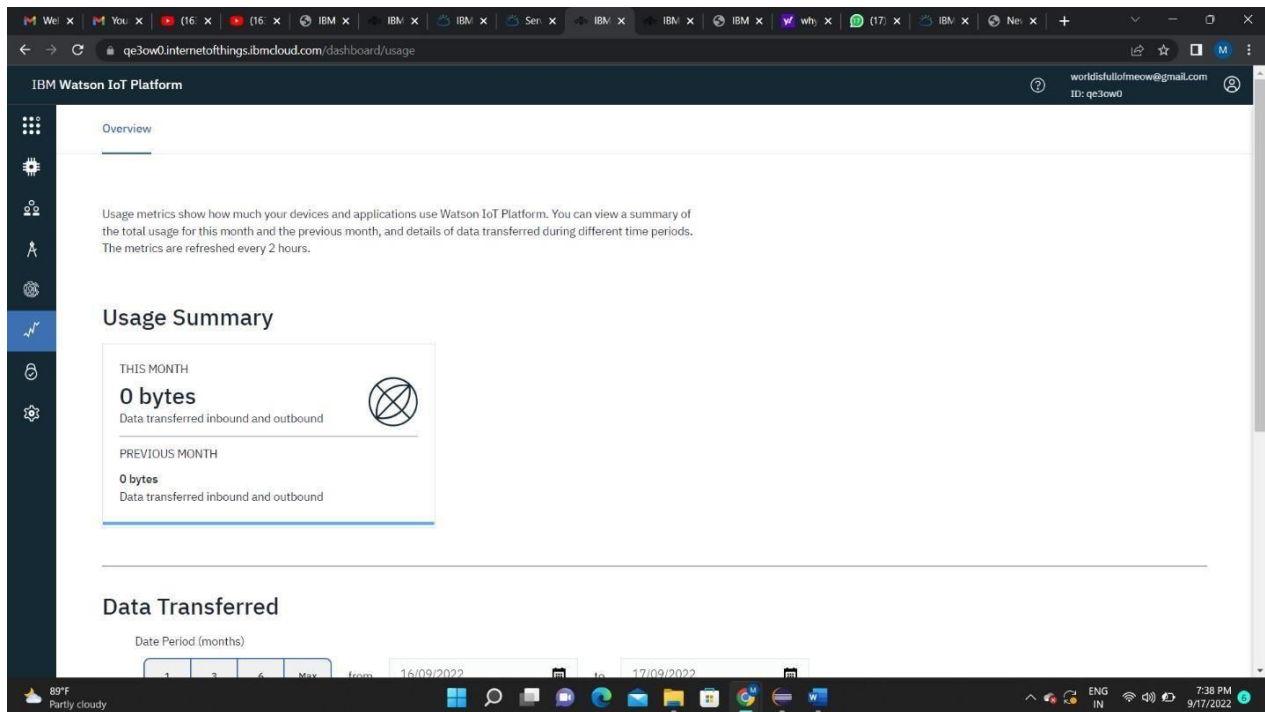

9. Once logged in the name will be displayed and it goes back to the first page

10. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices

11. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

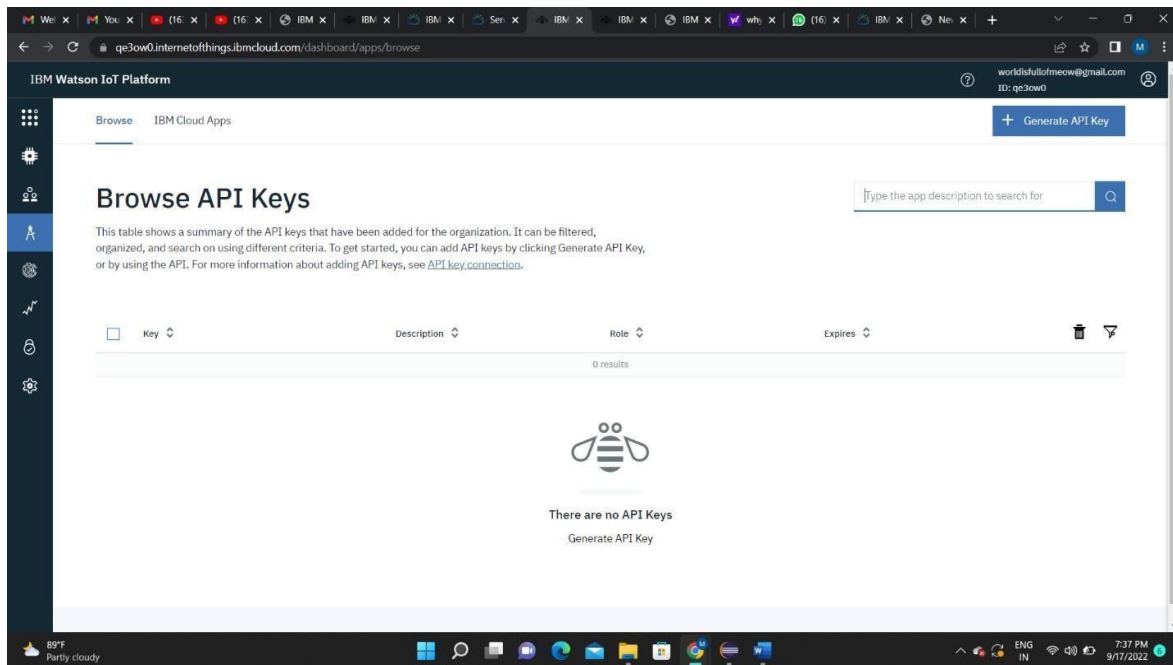

12. The member tab is add the teams members to work in the platform

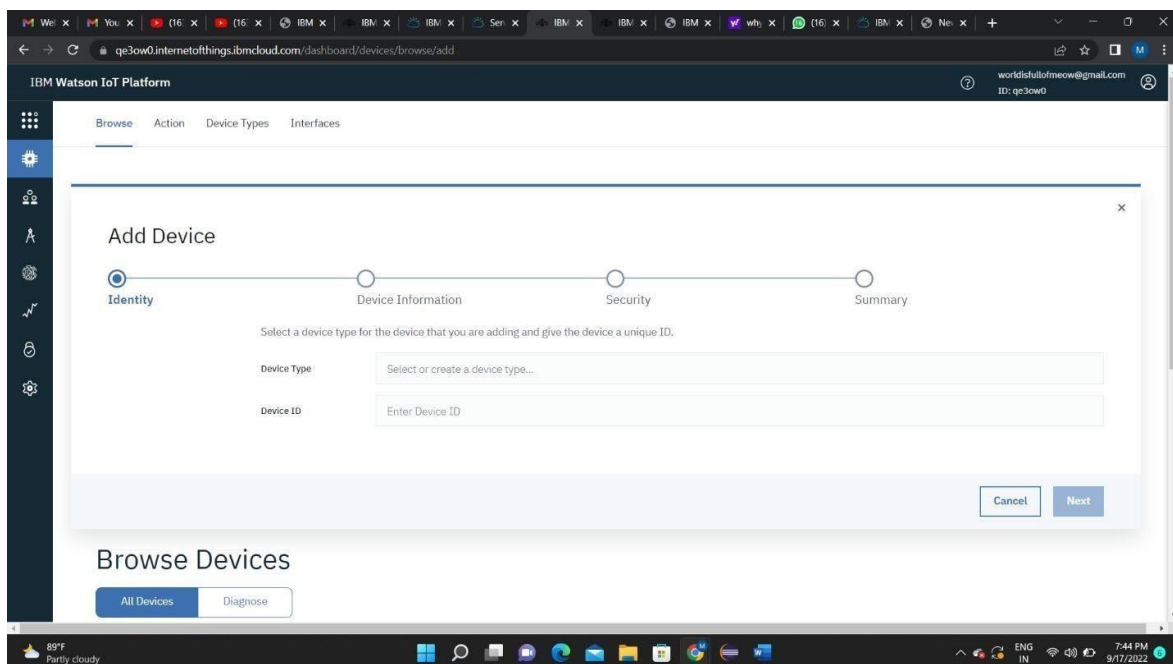

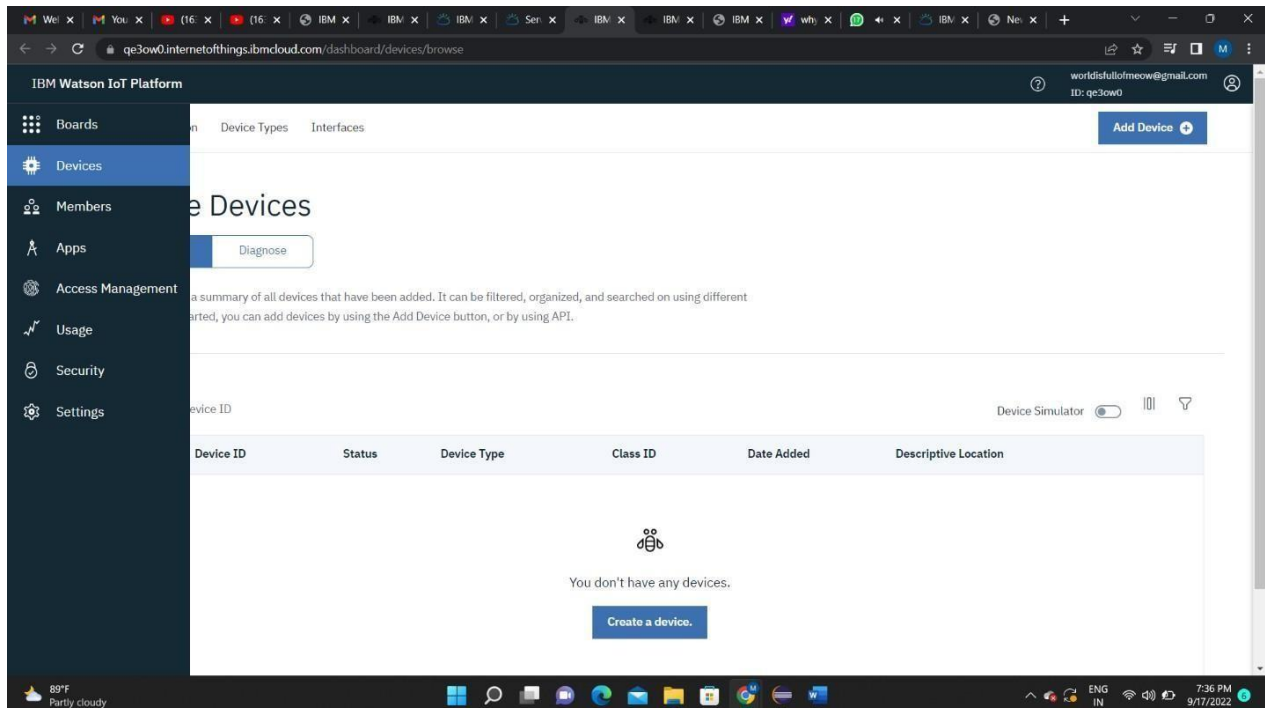

The screenshot shows the 'Browse Members' page in the IBM Watson IoT Platform. The page title is 'Browse Members'. Below the title, there is a search bar with the placeholder text 'Type the member email to search for'. Below the search bar, there is a table showing the members of the organization. The table has columns for 'Email Address', 'Name', 'Role', 'Added By', and 'Expires'. There is one member listed: 'worldisfulofmeow@gmail.com' with the role 'Administrator'. The page includes a sidebar with navigation icons and a top bar with the user's email and ID. The bottom of the screen shows a Windows taskbar with various application icons and system information like temperature and time.

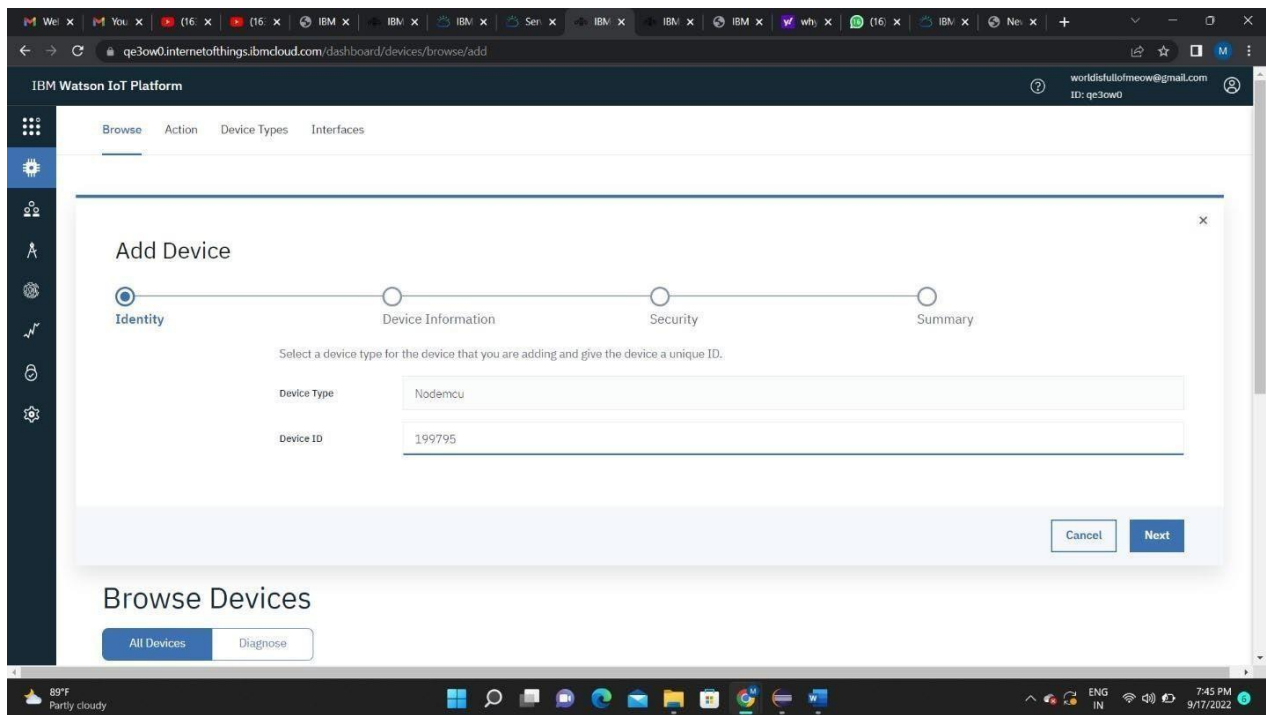

Email Address	Name	Role	Added By	Expires
worldisfulofmeow@gmail.com	worldisfulofmeow@gmail.com	Administrator	-	-

13. This tab is used when you want to connect to some other platform and to integrate with other services.

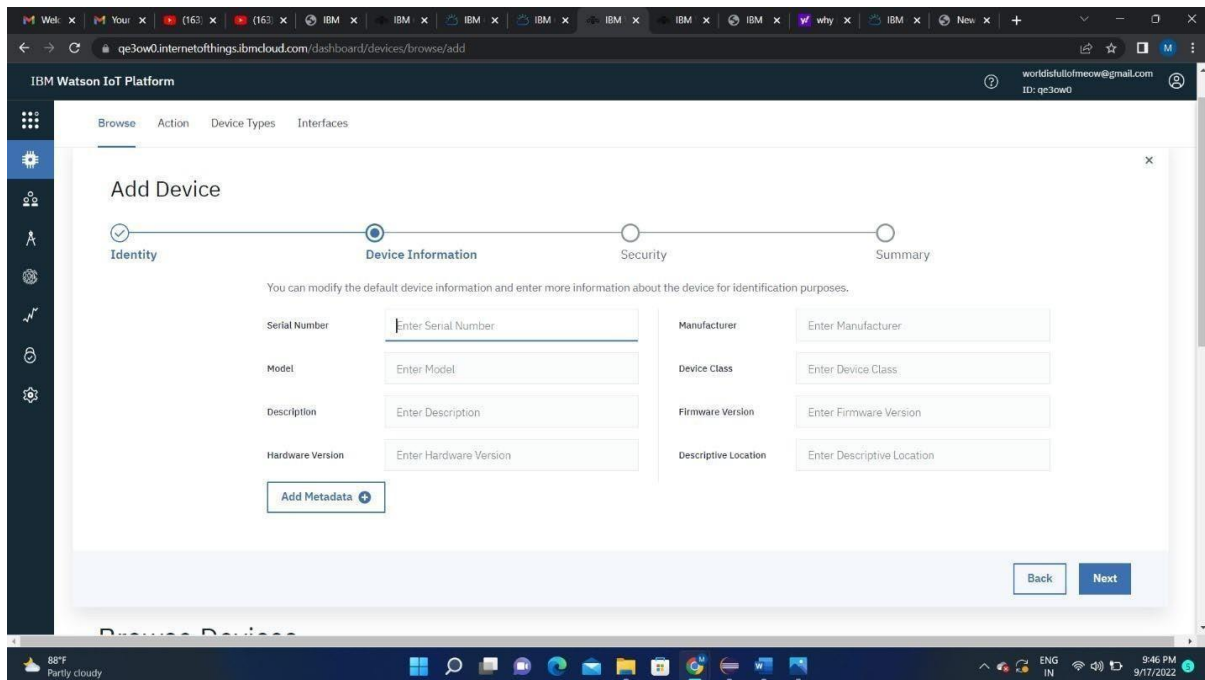

14. Click on the device tab and click on the add device button, then give the device type and device id and click next

15. This page to enter extra details and of the hardware

16. Clicking next it goes to the security where we do authentication token id.

The screenshot shows the 'Add Device' wizard in the IBM Watson IoT Platform. The 'Security' step is active, showing two options for authentication: 'Auto-generated authentication token (default)' and 'Self-provided authentication token'. The 'Auto-generated' option is selected, and a text box displays the generated token: '1997199520012005'. Below the token, a note states: 'Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.' and 'Authentication token are encrypted before we store them.'

IBM Watson IoT Platform

ID: qe3ow0

Browse Action Device Types Interfaces

Add Device

Identity Device Information Security Summary

There are two options for selecting a device authentication token.

Auto-generated authentication token (default)

Allow the service to generate an authentication token for you. Tokens are 18 characters and contain a mix of alphanumeric characters and symbols. The token is returned to you at the end of the device registration process.

Authentication Token: 1997199520012005

Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.

Authentication token are encrypted before we store them.

Self-provided authentication token

Provide your own authentication token for this device. The token must be between 8 and 36 characters and contain a mix of lowercase and uppercase letters, numbers, and symbols, which can include hyphens, underscores, and periods. Do not use repeated characters, dictionary words, user names, or other predefined sequences.

17. Clicking on next it goes to the summary of the device then click finish

The screenshot shows the 'Add Device' wizard in the IBM Watson IoT Platform, now at the 'Summary' step. It displays the information entered in the previous steps: 'Device Type: Nodemcu', 'Device ID: 199795', and 'Security Token: 1997199520012005'. There is a 'View Metadata' button next to the device ID. At the bottom right, there are 'Back' and 'Finish' buttons.

IBM Watson IoT Platform

worldisfullofmeow@gmail.com

Browse Action Device Types Interfaces

Add Device

Identity Device Information Security Summary

Verify that the following information is correct then select Finish

Device Type: Nodemcu

Device ID: 199795

View Metadata

Security Token: 1997199520012005

Back Finish

18. The device credentials will be displayed with all the details

The screenshot shows the IBM Watson IoT Platform interface. The left sidebar contains navigation icons. The main content area is titled 'Device Drilldown - 199795'. Under the 'Device Credentials' tab, a table displays the following information:

Organization ID	qe3ow0
Device Type	Nodemcu
Device ID	199795
Authentication Method	use-token-auth
Authentication Token	1997199520012005

Below the table, a warning icon and text state: 'Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token. Find out how to add these credentials to your device'.

19. Safe the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

This screenshot shows the same IBM Watson IoT Platform interface as before, but with a Notepad window open on the right. The Notepad window contains the following text, which is a copy of the device credentials from the previous screenshot:

```
Organization ID qe3ow0
Device Type Nodemcu
Device ID 199795
Authentication Method use-token-auth
Authentication Token 1997199520012005
```

20. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar labeled 'Search by Device ID' is present. A table lists devices with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. One device is listed: ID 199795, Status 'Disconnected', Device Type 'Nodemcu', Class ID 'Device', and Date Added '17 Sep 2022 20:07'. Below the table, a dropdown menu is open, showing tabs: 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected, displaying a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: Event, Value, Format, and Last Received. The bottom of the screen shows a Windows taskbar with the date and time '8:11 PM 9/17/2022'.

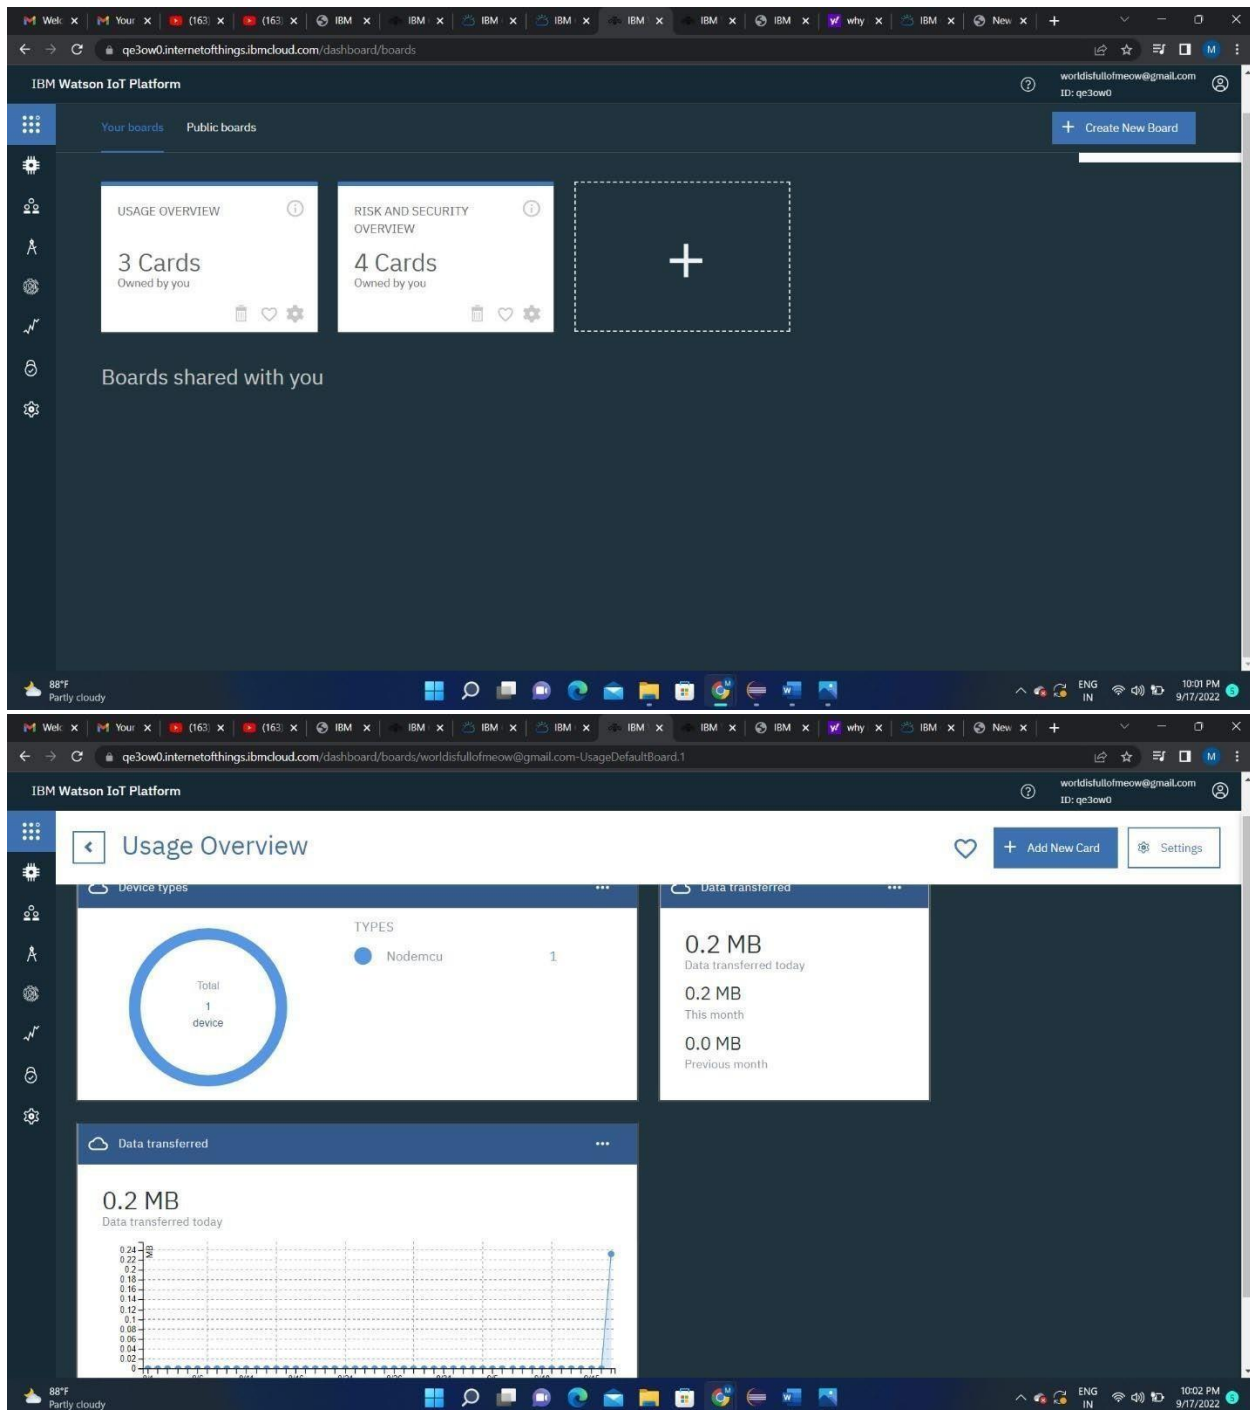

This screenshot shows the details of the selected device (ID 199795) in the IBM Watson IoT Platform. The 'Device Information' tab is selected, displaying a table with the following details:

Device ID	199795
Device Type	Nodemcu
Date Added	17 Sep 2022 20:07
Added By	worldisfullofmeow@gmail.com
Connection Status	Disconnected

At the bottom of the details view, it shows 'Items per page: 50' and '1 of 1 page'.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

21. The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
