

DEVELOP A PYTHON SCRIPT

Date	21-10-2022
Team ID	PNT2022TMID17666
Project Name	IOT based safety gadget for child safety monitoring and notification
Maximum Marks	4 Marks
Submitted By	PRIYA VASUNTHARA JANANI ISHWARYA JANANI

SCRIPT:

```
a=int(input())  
b=int(input())  
c=a+b  
print ("The sum is", c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())  
2 b=int(input())  
3 c=a+b  
4 print ("The sum is", c)
```

Below the editor, the Run console is visible, showing the execution of the script. The command executed is `C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py`. The output shows the program taking inputs 4 and 8, calculating the sum, and printing "The sum is 12". The console also indicates that the process finished with exit code 0.
